

## Neonatal Syringe Set with 150 Micron Filter

**A safe, cost-effective system to standardize the preparation and administration of small volume prefilled syringes of Whole Blood, Red Blood Cells, Platelets, Fresh-frozen Plasma and Cryoprecipitate.**

- Spiked system eliminates the worry of needlestick injury, meets OSHA requirements and complies with national needleless laws <sup>1</sup>
- Provides 150 $\mu$  final filtration in accordance with AABB blood administration requirements <sup>2</sup>
- Syringe aliquots of RBC's, Plasma and Cryo must be administered to patient within 24 hours and syringe platelet aliquots within 4 hours of preparation <sup>3</sup>
- Available in MANY configurations with BD™ or Monoject® Syringes 30, 35, 50 or 60 mL Syringe Volumes, Spiked and Spike-less
- **100% of all CODAN Blood Filter Sets are DEHP FREE**

### When used with sterile connection technology:

- **Limits bacterial contamination by maintaining a closed system during preparation**
- **Maintains primary blood component's original expiration date**
- **Maximizes use of entire blood component**
- **Limits recipient exposure to multiple donors**
- **Eliminates cost of aliquoting to a transfer bag**
